Fuel Dashboard

The Boeing Fuel Dashboard provides aircraft operators with a comprehensive total-fleet view of operational fuel consumption. This smart application is part of Boeing's easy-to-implement fuel-efficiency solutions suite which identifies broad savings opportunities. Airlines, business aviation operators and military organizations can use Fuel Dashboard's intelligent decision aids to gain insight into current fuel usage through all phases of flight. This visibility enables better decision-making to reduce fuel consumption, costs and emissions.

A comprehensive view of your operation, for the most accurate analysis

The Fuel Dashboard is an intuitive, customizable dashboard and reporting solution. You control how to view and analyze information. You can quickly make informed decisions and adjust your operation in ways that will accelerate fuel-efficiency improvements. The Fuel Dashboard identifies fuel-savings opportunities through:

- Instant insight into existing fuel-consumption details derived from operational performance data across all phases of flight.
- A fully-integrated view of all relevant fuel-consumption data from flight planning. Data sources include loads and weight and balance records, ACARS, fuel accounting and inventory systems, technical logs and/or an electronic flight bag.
- Comprehensive analytics displayed through easy-to-use visualization of more than 90 key parameters for each flight.
- Forecasting ability of fuel-saving potential of proposed operational changes by running predictive scenarios.
- High-level total fleet overview and route-by-route drill-down capability into each fuel-saving initiative to evaluate operational alternatives.
- Ability to export accurate statistical data to a pilot-specific interface for improved pilot performance.

Implementation

The web-based Fuel Dashboard is easy to implement and use and requires minimal training.

Suite of Fuel-Efficiency Solutions

In addition to Fuel Dashboard, Boeing offers consulting services and a suite of solutions to help you optimize your fuel consumption throughout all phases of flight.
