Electronic Flight Bag Solutions

Electronic Flight Folder

The Boeing Electronic Flight Bag (EFB) is focused on improving your operational performance by bringing the technological advances of computer information delivery and management to the airplane flight deck, providing integrated solutions for managing information in the air and on the ground.

Essential Information at Your Fingertips

The Electronic Flight Folder (EFF) enables the transmission of electronic day-of-flight information (such as flight plans and weather) to the EFB, improving flight crew operational effectiveness and reducing paper handling.

EFF has the following key properties:

- Intuitive data presentation and page flows
- Supports electronic signatures for crew acceptance of flight plans and loadsheets
- Provides display and content customization to suit airline-specific needs
- Interfaces with ARINC 429 airplane systems

EFF ground systems include:

- Dashboard for dispatchers to monitor data
- Post-flight report assembly and storage
- Interfaces with existing flight plan systems

Key benefits

- Saves money by reducing paper printing, handling and storage costs
- Saves time by improving labor efficiencies with flight crew and ground report processing
- Improves quality by automatically gathering avionics data
