## Electronic Flight Bag Solutions

# Electronic Flight Folder

The Electronic Flight Folder, available on portable devices, focuses on improving your operational performance through integrated technological solutions that manage information on the flight deck and on the ground. In combination with subsidiary Jeppesen's navigation solutions, Boeing's Electronic Flight Bag Solutions provide a powerful and comprehensive pilot productivity tool suite.

---

## Essential Information at Your Fingertips

The Electronic Flight Folder enables the transmission of electronic day-of-flight information (such as flight plans and weather) to the Electronic Flight Bag (EFB), improving flight crew operational effectiveness and reducing paper handling.

### Key benefits

- Saves money by reducing paper-printing, -handling, and -storage costs
- Saves time by improving flight-crew efficiency and ground-report processing
- Improves quality by automatically gathering avionics data\*

### Key features

- Displays intuitive data and page flows
- Supports electronic signatures for crew acceptance of flight plans and loadsheets
- Provides display and content customization to suit airline-specific needs
- Interfaces with ARINC 429 airplane systems\*
- Connects for use anywhere pilots have Internet access

- Provides post-flight data assembly and storage
- Interfaces with existing flight plan systems using ARINC 633 spec

### Devices

Electronic Flight Folder is available on iPad and Windows tablet devices and Boeing Class 3 EFB.
