

Maintenance Performance Toolbox Toolbox Mobile Parts

Maintenance Performance Toolbox

Toolbox Mobile Parts

Toolbox Mobile Parts is part of Boeing's suite of mobile maintenance applications. With this application, technicians can check on the availability of required parts using a mobile device, reducing the need for trips back to the line maintenance office. Maintenance and engineering personnel have access to the most current inventory information, for instant reference and use, wherever and whenever it is needed. Toolbox Mobile Parts integrates seamlessly with Toolbox Mobile Library and Maintenance Turn Time to provide a full mobile maintenance troubleshooting solution.

Instant access to inventory information, wherever you are.

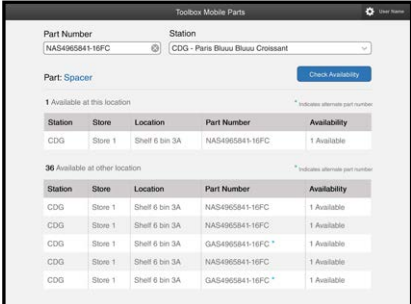

Toolbox Mobile Parts

provides mobile access to:

- Part availability, identifying preferred location or multiple locations
- Original and alternate part numbers
- The most current inventory information

Key benefits:

- Reduces part ordering errors
- Helps return airplanes to service faster
- Integrates seamlessly with Boeing's suite of mobile maintenance applications
- Offers intuitive and easy-to-use interfaces
- Allows lookup directly in Illustrated Parts Catalog hosted in Toolbox Mobile Library

Station	Store	Location	Part Number	Availability
