Crew Planning

Whether you are a start-up airline looking to optimize your crew planning from the start or a mature airline that wishes to improve crew usage or improve management control and forecasting, the Boeing Professional Services team has a solution that's right for you. Through our consulting engagements, we can improve crew productivity and efficiency through improved planning processes and optimization tools.

Optimize your crew for increased productivity, safety and operational stability

The Crew Planning practice offers the following consulting services:

Crew Planning and Process Improvements

- Crew needs assessment
- Crew management process evaluation
- Crew management process development
- Management support
- Key Performance Indicator development
- Union contract support and facilitation

Fatigue Management

- Fatigue Risk Management assessment
- Disruption mitigation plan

Proven value

You can achieve measurable results through our services:

- 3.2% reduction in flight crew cost (\$3M)
- 50% reduction in training simulator slots
- 1.8% crew cost reduction from using re-timing functionality
- 4.5% reduction in flight crew cost (\$10M)
