Fleet Services

Accelerated Delivery Service

Accelerated Delivery Service improves Toolbox online performance for network-challenged customers. This service utilizes Boeing-hosted Citrix servers to increase the reliability of customer access to Toolbox.

Providing Reliable Access to Toolbox from Anywhere

Accelerated Delivery Service allows you to:

- Access Toolbox from locations with varying bandwidth sizes, latency and limited IT support
- Deploy to main hub and outstations
- Avoid costs of upgrading entire network infrastructure
- Maximize the use of efficiency tools
- Continuously improve maintenance performance without network disruptions
- Experience the benefits of Toolbox even in areas with poor network infrastructure

Key benefits

- Lower network usage due to highly compressed data transmission
- Significantly reduces bandwidth requirements
- Boeing manages Toolbox plug-ins, eliminating customer upgrade requirements

— Toolbox Remote
