

Maintenance Performance Toolbox Training Module — Instructor Tools

Maintenance Performance Toolbox

Training Module — Instructor Tools

Instructor tools provides the ability for instructional designers and technical subject matter experts to develop and assemble course material for teaching students about airplane systems and maintenance with easy access to the most up-to-date information.

Streamline Your Airplane System Training Operation

Instructor tools allows you to:

- Assemble a course or lesson, by linking to up-to-date airplane configuration and technical information
- Locate and include any of the maintenance or training information contained in Toolbox, including 3D location diagrams, photographs, system synoptics and airplane maintenance documentation
- Include airline-unique information stored within the customer environment
- Add teaching points and instructor notes and student notes to individual presentation slides
- The presentation environment allows for single- or dual-projector classroom presentation modes
- Publish student and instructor notebooks for classroom use and offline study

Key benefits

- Enhanced training media for better student retention of information
- Quick assembly of courses and lessons for tail-number-specific subjects
- Easy assembly of courses, using the most up-to-date information from Toolbox
- Faster and easier system cross-training
- Courseware management tools that provide administrative control over training development and training content lifecycle

Key notes

- 787 Toolbox only
- Regulatory approved B1/B2 courseware available
